Billy

- The Centre is constantly monitored
- FIGU and its members are harassed by the police
- Billy shot an animal that attacked and injured Members but got into trouble with the police although later determined the animal was aggressive due to a brain tumor
- 45-years ago Billy was out for a late night contact and saw 27-foxes in the forests nearby
- Billy and Sfath were in Siberia and referred to a primitive create with 40 cm footprints but Billy did not wish to discuss
- Billy sees a flying object above the Centre at the same time as a passenger aircraft flies overhead
- The flying object returns 20-min later and then suddenly disappeared and is of unknown origin
- Asks about Wimsen Cave in Germany however Florena does not know about it
- Has mostly recovered from a brain stroke with minor difficulty speaking in which case the group members assist
- Visited many planets in our Solar System with Sfath
- Like earth, other planets in our SOL have polar lights including Jupiter and Saturn which brings surprizes to earth's scientists

Plejaren

- Do not have primitive creatures
- People on Erra, who are kept informed on the happenings on Earth, do not understand the rationale for the Swiss Government abandoning their neutrality and endangers their state peace and why the people of Switzerland do not act to remove them from office
- For more than 52,000 years, the **neutrality** of the Plejaren peoples has been represented by various state leaderships of the Federation who have maintained their security and state peace

Corona Virus

- The published number of those killed by the coronavirus is falsely lowered than what is true
- 8,314,088 earthly people have died of the coronavirus, many as a result of unsuitable vaccines
- ***The corona vaccines attack the DNA and also produce different types of cancer, as well as damaging the nervous system and impairing and damaging the functions of the brain***

War in Ukraine

- Evolved into a world war that has never taken place in this way before
- This war would not have happened if America, as the secret head of NATO, had not provoked the whole thing until Russia's patience ran and it triggered the war
- There are plans to murder Zelenskyy by associates within his environment
- Ukraine shall be indebted to the USA for decades due to the billions of dollars in arms supplies
- Ukrainian military sabotaging its own country by committing acts of war and destruction including raping and murdering their own people, and then blame the Russian military
- Germany and France, and others are involved in the war led by the American dark-state
- A Russian phobia has arisen and even citizens from Russia are physically attacked and discriminated against worldwide
- War always results in the prices for all goods being irresponsibly driven up to help strengthen the military
- Many people come to believe Zelenskyy's lies however sooner or later the truth will become known to many
- Zelensky is widely referred to as a NAZI
- America, wanting the war to prolong, continues funding weapons to supply Zelenskyy
- America is getting more and more into debt and driving its own country to ruin and its people are slowly falling into more misery and hardship as a result
- Ukraine is only a means to an end in order for America's deep-state to gain world domination, to which the world's population contribute so that this succeeds

USA

- The USA ongoing supplying arms to Ukraine is going further into debt which their own people will have to pay through horrendous taxes

Swiss Government

- Switzerland is entering into a so-called "cooperative neutrality" with NATO
- Swiss government violation of neutrality by applying sanctions against Russia has made them their enemy
- This means that Switzerland must participate in military acts of war with NATO
- Implemented drone height restrictions to 100 m above which a special permit is required

Government Transparency

- Government agencies should actively provide information on all topics that contribute to the formation of opinion and the preservation of democratic and constitutional concerns
- Public authorities are also obliged to disclose information about their structure, their responsibilities and their contact persons
- This is intended to give the public a better understanding of the structure of administration and the way in which it is used

Mankind

- Currently over 9.2 billion earthlings
- War crimes unknown to the people are rarely or never punished including murder, rape, torture and other injustice and America leads in this regard
- Not all people have the same right as the majority of the rulers, people in power, make their own rights compared to average citizens who are less well-off and unable to rightfully defend themselves
- The majority of public and municipal officials feel powerful over citizens who do not follow the often very crazy laws, regulations
- In all countries of the world a great deal of secrecy is carried out by the state leaders
- Much information is concealed so that the people are not really informed
- Regulations and ordinances are stupidly prescribed that curtail human freedom to the detriment of the people
- In all the various secret services, they are more than just degenerate and evil
- Drones have become very useful for assassinations

Mankind (cont)

- The principle of equal treatment can be found in ancient writings and only followed by a few today:
 - You shall not look at man in court as a trivial person
 - You shall hear the small and the poor as well as the big and rich equally
 - You should also be afraid of nothing, for true law and equality and their truth are valid for all and are a cause that guarantees peace and love
- Vindictiveness is an evil widespread among humans
- Through political partisanship a healthy freedom of expression is never given nor possible
- Thousands of assassinations go unpunished every year, committed for profit, inheritance or hatred without being known as they are never investigated by coroners
- People are guided by ill-considered personal ideas and desires, not according to what is necessary towards peace, love, true progress and real humanity
- There can be no progress as long as killing is allowed whether in war or in the death penalty as this is contrary to the right of life, which must be understood

Self Control

- Humans let their deepest character traits run free without restraint as soon as something does not suit them or is misled by lies and slander
- Hatred, revenge, lies, murder and manslaughter or other evil are deposited within the depths of one's character and when uncontrollably let outwards, then the catastrophe happens
- Through effectual thinking it can be learnt that the bad and evil qualities that have been deeply deposited in the character can be mastered and thus controlled or even made void and dissolved

Mother Earth

- In certain places in the world's oceans the phytoplankton takes over and attracts manta rays in large quantities which is a sign that the planet and nature will take revenge for all that the earthling destroy which no one recognizes
- https://youtu.be/vkMRx44F_aY?t=130

Over Population

- The younger generation who protest about the environment are the one's giving birth and real cause of over population
- Excessive CO2 is caused not only by the cars but also by the people themselves
- We (*Plejaren*) have tabled a motion for a resolution calling on the Commission and the Member States to take the necessary steps to ensure that the Community does not lose sight of its responsibilities in this area
- The people's urge for luxury leads to planet Earth being exploited by companies and corporations leading to rapid dwindling resources
- The number of people should be limited by a worldwide and multi-year ban on births
- People who are suffering, and in need and in misery does not concern the leaders of the state, because they pay attention only to their own well-being, their safety and reward but express false sympathy and fake concern
- People are lulled into a delusional religious belief in a non-existent God, which hinders their ability to think clearly and prevents them from realizing they are responsible for over population

Alzheimer's Dementia

- Alzheimer's has its origins in the brain in the womb before birth that is very difficult to detect, which then over time inevitably triggers a degradation of cell structures and has 3-stages
- Alzheimer's has a very long asymptomatic phase, which begins as a small child
- Alzheimer's drags on for many years until symptoms start to appear which can take 80 years or more until it becomes acute
- For decades humans do not notice when they are affected however gradually the first signs appear as memory lapses considered harmless, but increase in number and gradually they become unsteady and erratic
- They become more forgetful and unable to find their daily utensils
- Over time, they get tangled up in the middle of speech and can not finish
- The human being becomes unable to read or concentrate, including loss of personal hygiene and eating becoming fully dependent upon others

Alzheimer's Dementia (cont)

- The first indications of Alzheimer's can be detected in puberty, this is also the case when amyloidosis skin spots appear and become visible which are abnormally folded proteins that cluster
- The asymptomatic phase can last for many years, but during this time characteristic biological features and changes in the brain are already recognisable and can be detected
- After the asymptomatic phase, the so-called pre-dementia phase begins affecting such as abilities, attention, memory, learning, creativity, planning, orientation, imagination, reasoning
- People with Alzheimer's disease are less able to retain new information, during which time a significant decrease in brain mass in the hippocampus can be observed
- It is not uncommon for human beings in this stage of Alzheimer's dementia to appear very depressed, because they react to their change with fear, grief and shame
- Alzheimer's cannot be cured with current earth medicine for a long time
- The progression of the disease can be delayed by appropriate cognitive and psychomotor therapy
- Humans affected by Alzheimer's can train their coordination and perception, as well as their balance, in the early stages, so that their symptoms can be kept quite stable for year
